Dean's Message

Dear Students;

Welcome to Near East University Faculty of Agriculture.

Among the long-term goals of our faculty is to increase international and interdisciplinary research collaborations that will take our university and our country into the future. Contributing to scientific progress and innovation in our country and in the world through international projects and collaborations is among our important goals. While all these are aimed, our main desire is to lead sustainable agriculture by protecting the ecological values of Cyprus. At the same time, it is to find solutions to agriculture and animal welfare in cooperation with up-to-date information in the field of agriculture and local and international communities. For this purpose, we aim to protect our natural resources consciously while minimizing the waste of resources in the near future, and to ensure that scientific studies are transformed into innovations.

In this context, we will make a conscious effort to ensure that our research power is prioritized so that we can respond to local and global problems that arise in our region.

The only goal of our faculty is to train you well-equipped in sustainable agriculture, protection of natural resources, natural biological cycles, organic agriculture and ecosystem services, and to bring you to a superior education level that can contribute to the leading organizations related to agriculture in the world. We will be happy to walk this path together.

Prof. Dr. Özge Özden

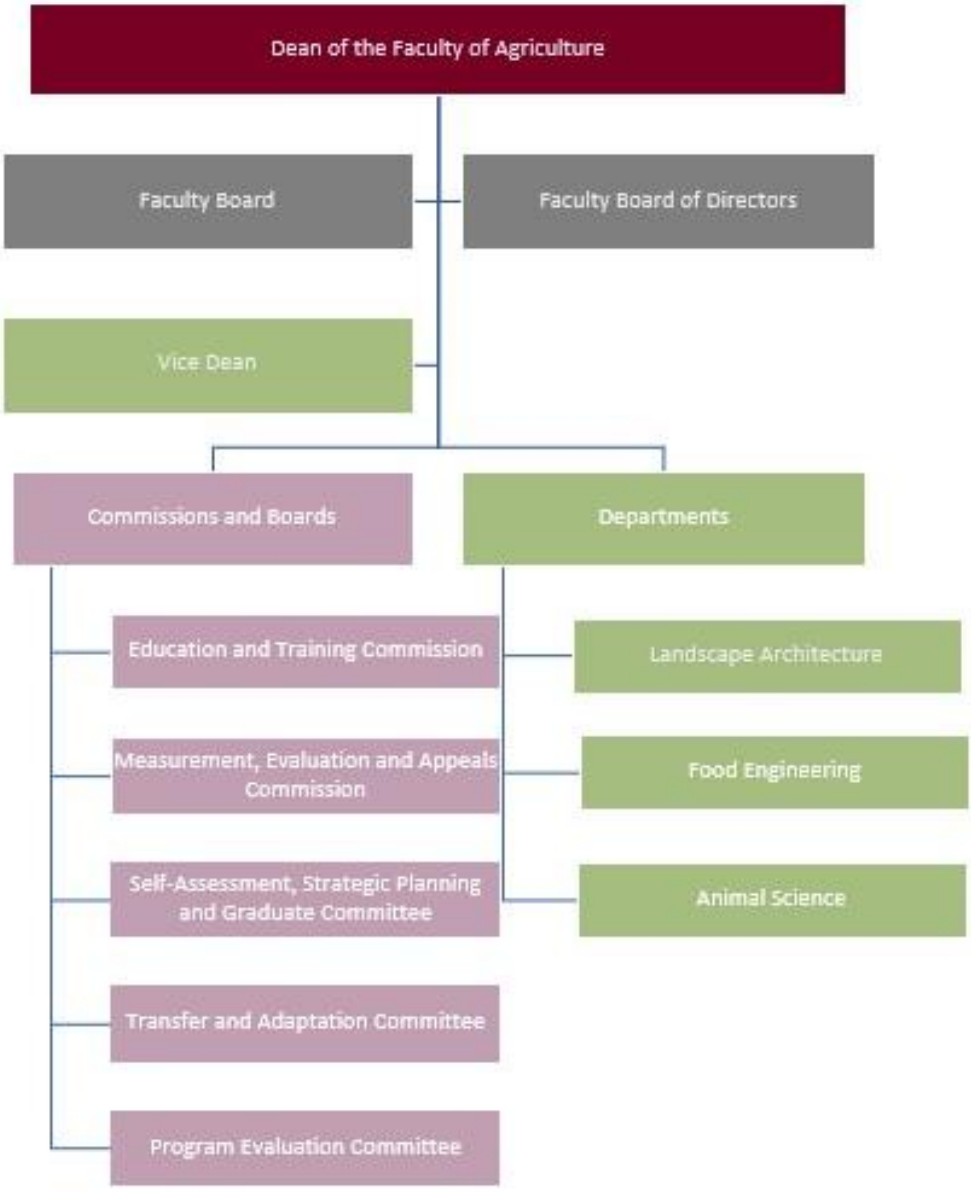

About Us

The Faculty of Agriculture at Near East University was established in 2021. It comprises three distinct departments: Landscape Architecture, Food Engineering, and Animal Science. The duration of education in all three departments is four years.

Mission: As with all the projects undertaken and carried out by our university island-wide, our Faculty of Agriculture aims to serve our country and humanity by contributing to the development of new knowledge, technology, and products, particularly in the agricultural field, within the framework of sustainability and ethical principles, creating an environment for contemporary learning and progress. Within this framework, our faculty was established with the aim of training innovative, highly aware, and qualified landscape architects, food engineers, and animal scientists capable of interdisciplinary work.

Vision: As a unit of Near East University, one of the best universities on our paradise island, surrounded by water on four sides, with its diverse resources and numerous endemic species recognized in the world literature in agriculture and animal science, our vision is to be a student-focused faculty that contributes to economic, social, societal and cultural life at both national and international levels, uses technology effectively, keeps sustainability at its center in all its dimensions, and is of high quality and pioneering in scientific endeavours.

Faculty Organization Chart

Why Agriculture Faculty?

The Faculty of Agriculture, with its competent and experienced academic staff, offers continuously updated programs tailored to the needs of the times, providing our valued students with a quality educational environment.

The faculty's diverse undergraduate programs and transfer opportunities allow you to explore your interests and talents, while also providing access to a wide range of career opportunities at national and international levels after graduation.

Our faculty offers both Turkish and English as languages of instruction, and our English-language programs, in particular, prepare you for the global workforce and increase your chances of employment in international institutions and organizations.

Thanks to the strong communication channels established between our academic and administrative staff and our students, you have the opportunity to directly communicate any opinions, suggestions, and needs regarding your education to your advisors and faculty administration.

Our faculty not only supports your academic development but also aims to empower you socially through organized social events and club activities. The faculty administration supports the entrepreneurial spirit of student clubs and helps our students develop their leadership skills through social responsibility projects. In addition, the peaceful campus life, combined with the modern infrastructure of Near East University and the cultural richness of Cyprus, offers a productive education and living environment that will support your personal development.

DEPARTMENT OF ANIMAL SCIENCE

Dear Students,

Welcome to the Department of Animal Science at Near East University.

As the global demand for safe, high-quality, and sustainable animal products continues to rise, the importance of animal science in ensuring food security, animal welfare, and environmental sustainability has never been greater. Our mission is to educate professionals who can integrate scientific knowledge with practical applications to improve animal production systems and contribute to the advancement of the agricultural and food sectors.

At the Department of Animal Science, we aim to develop individuals who are knowledgeable, responsible, and innovative professionals capable of applying modern technologies in animal breeding, nutrition, health, and management. Our program combines theoretical knowledge with hands-on laboratory, farm, and field experiences to ensure our students are well-prepared for careers in research, industry, and public institutions.

We emphasize sustainable livestock practices, animal welfare, and the efficient use of natural resources to address the challenges of the 21st century. Through an interdisciplinary approach, our students gain the ability to analyze, design, and implement solutions that enhance both productivity and animal well-being.

We are proud to offer an education that not only focuses on academic excellence but also nurtures ethical responsibility, scientific curiosity, and leadership. Supporting your academic and personal growth throughout your journey will be our top priority.

Welcome to our department. I wish you a successful, productive, and inspiring university life where you will contribute to building a more sustainable and ethical future for both animals and humanity.

Deputy Head of the Animal Science Department

Dr. Hüseyin Çelik

Degrees Earned

Students who successfully complete the program will receive a Bachelor of Science in Animal Science.

Program Admission Requirements

According to regulations set by the Turkish Council of Higher Education (YÖK), student admission to this undergraduate program is through the university entrance exam (YKS). After students submit their academic program preferences, the Student Selection and Placement Center (ÖSYM) places them in the relevant program based on their ÖSYS scores.

International students are admitted to this undergraduate program based on their scores on international exams such as the SAT, ACT, or their high school diploma scores.

Exchange student admission is based on the terms and conditions set forth in bilateral agreements signed between NEU and the partner university.

Visiting students may enroll in courses in this program with the approval of the relevant academic unit. Furthermore, as the language of instruction at NEU is English, they are required to demonstrate their English proficiency.

Graduation Requirements and Rules

To graduate, students enrolled in this undergraduate program must have a Weighted Cumulative Grade Point Average (GPA) of at least 2.00/4.00 and have completed all courses in the program with a minimum DD/S letter grade. The minimum ECTS credit required for graduation is 240. Students are also required to complete a mandatory internship of a specific duration and quality.

Recognition and Evaluation of Prior Learning

Full-time students at Near East University may be exempt from certain courses, subject to relevant regulations. If the content of a course previously taken at another higher education institution is equivalent to a course offered at NEU, the student may be exempted from the course after evaluation and with the approval of the relevant faculty/institute.

Program Information

Our goal is to equip students with an ethical, innovative, and sustainability-oriented perspective in the fields of animal production, health, and management, guided by universal scientific and professional values. We aim to train qualified animal scientists who are analytical, responsible, and capable of applying theoretical and technical knowledge to real-world challenges in livestock and food systems.

The program emphasizes developing a deep understanding of animal breeding, nutrition, welfare, and production systems while integrating modern technologies and sustainable practices. Furthermore, our core objectives include generating knowledge to enhance food safety, animal welfare, and environmental protection, addressing global challenges such as climate change, biodiversity loss, and resource efficiency. The Department also contributes to the

scientific community through national and international research collaborations, publications, and projects focused on advancing sustainable animal production.

Program Outcomes

The program aims to equip students with the following program learning outcomes:

- PLO1. Possesses theoretical and practical knowledge in animal breeding, feeds and animal nutrition, biometrics, and genetics, which constitute the core fields of Animal Science.
- PLO2. Evaluates new developments and applications in Animal Science and develops projects and solution proposals for problems encountered in animal production.
- PLO3. Uses the infrastructure and laboratory facilities required to solve problems in the livestock sector in accordance with contemporary scientific and technological requirements.
- PLO4. Identifies problems in animal production and effectively presents developed solutions using written, oral, and visual communication tools.
- PLO5. Uses computer software, hardware, and information technologies required in Animal Science and adapts them to professional applications.
- PLO6. Participates in national and international projects and presents project results using scientific methods.
- PLO7. Works effectively in multidisciplinary fields and projects.
- PLO8. Transfers scientific knowledge obtained through research and technology transfer to education and society.

PLO9. Develops the ability to prepare, write, and present scientific articles at national and international levels.

PLO10. Practices the profession with awareness of authority and responsibility in accordance with scientific and professional ethical principles.

Program Structure

To graduate from this undergraduate program, students must:

To graduate from this undergraduate program, students must successfully complete the curriculum with at least 240 ECTS credits, 63 courses, and the required 17 elective courses; obtain at least DD/S grades in applicable courses; maintain a minimum CGPA of 2.00/4.00; and complete the compulsory internship requirements.

The four-year program and elective course list are presented below:

Additional Information

A total of 240 ECTS credits are required for graduation. The current curriculum comprises 63 courses, 17 electives and 154 local credits. The supplied curriculum reports an elective-course ratio of 27%. Animal Science students must successfully complete required courses and electives in accordance with the approved curriculum.

Our programs require 70% course attendance. Students who fail to meet the required attendance requirements will receive a letter grade of NA for the relevant course. An NA (Never Attended) grade is given to students who fail to meet the specified course attendance requirements and who lose their right to participate in end-of-term assessments. The NA grade is not included in the grade point average calculation. Students must also maintain 70% attendance in the same course in the following semester. Courses with a letter grade of FF are not subject to the 70% attendance requirement for repeating them.

Important Information About Elective Courses

Animal Science Department students must complete the elective requirements specified in the curriculum. Elective courses must be selected from the approved elective course list, and the ECTS load of selected electives must meet or exceed the values specified in the semester plan.

Exam Regulations, Evaluation, and Grading

Exam Guidelines, Evaluation, and Grading

At our university, course performance assessment is generally based on face-to-face exams, including midterm and final exams. However, in some courses, alternative assessment methods such as project assignments, presentations, homework, quizzes, and group work are also used to encourage active student participation and assess various skills.

The evaluation method for each course may vary depending on the specifics of the course and the instructor's preferences. Course evaluation criteria are announced to students by the instructor at the beginning of the semester and clearly stated in the course syllabus.

Students' course grades are calculated as a weighted average of the exams, assignments, and any other assessment tools administered within the course. Therefore, it is important for students to actively participate not only in the exams but also in all assessment elements administered throughout the semester.

For each course taken at NEU, students are assigned one of the letter grades described below, based on the evaluation conducted by the course instructor. Each letter grade carries an ECTS credit weight.

GRADE	LETTER GRADE	COEFFICIENT	ECTS GRADE
90-100	AA	4.0	A
85-89	BA	3.5	B*
80-84	BB	3.0	B*
75-79	CB	2.5	C*
70-74	CC	2.0	C*
60-69	DC	1.5	D
50-59	DD	1.0	E
49-00	FF	0.0	F

To be considered successful in any course, students must receive a minimum grade of DD for level 5 (associate degree) and level 6 (undergraduate) programs, a minimum grade of CC for level 7 (master's degree) programs, and a minimum grade of BB for level 8 (doctoral) programs. For courses not included in the general average, students must receive a grade of S (Satisfactory).

In addition, each local letter grade has an ECTS equivalent. This encourages inter-institutional mobility.

The table above is used for all courses at NEU. In addition to these letter grades, the following letter grades are also recorded in student course transcripts:

I	Tamamlanmamış (Incomplete)
S	Yeterli (Satisfactory Completion)
U	Yetersiz (Unsatisfactory
P	Yeterli İlerleme (Successful Progress)
NP	Yetersiz İlerleme (Not Successful Progress)
EX	Muaf (Exempt)
NI	Dahil Edilmemiş (Not included)
W	Dersten Çekilmiş (Withdrawal)
NA	Devamsız (Never Attended)

An I (Incomplete) grade is given to students who fail to fulfill course requirements by the due date of the relevant semester, for a valid reason acceptable to the academic staff offering the course. Students who receive an I grade must fulfill all remaining requirements no later than one week after the due date for submitting course grades for the relevant semester. However, in exceptional cases, this deadline may be extended up to two weeks before the start date of the next semester by the decision of the relevant academic unit administrator and the board of directors. For students who fail to fulfill their requirements by the given deadline, their I grade will automatically be converted to FF or U.

An S (Satisfactory) grade is given to students who pass non-credit courses.

A U (Unsatisfactory) grade is given to students who fail non-credit courses.

A P (Successful Progress) grade is given to students who demonstrate the expected performance within the relevant semester in courses not included in the GPA and whose requirements exceed one semester.

A NP (Not Successful Progress) grade is given to students who fail to demonstrate the expected performance within the relevant semester in courses not included in the GPA and whose requirements exceed one semester.

An EX (Exempt) grade is given to students who are exempt from the relevant course in the program.

An NI (Not included) grade is given for students' performance in courses they have taken but are not included in their overall GPA. These grades are included on the student's transcript but are not included in courses taken within the program they are enrolled in.

A W (Withdrawal) grade is assigned if the student withdraws from a course after the add/drop deadline for the relevant semester, with the recommendation of their academic advisor and the permission of the course instructor, and within 10 weeks of the semester beginning. Students cannot withdraw from any course during the first two semesters of the program. Furthermore, students who have previously received a W grade in a course and whose grade is not included in the grade point average cannot withdraw from the same course again. Students in associate degree programs may withdraw from a maximum of two courses, and students in undergraduate programs may withdraw from a maximum of four courses. The student must retake the course in the first semester it is offered.

An NA (Never Attended) grade is assigned to students who fail to meet the specified course attendance requirements and lose their right to participate in end-of-term assessments. The NA grade is not included in the grade point average calculation.

Student transcripts will show letter grades corresponding to both national and ECTS credits.

Graduation Requirements

To graduate from this undergraduate program, students must meet the following requirements: To be successful in all courses in the program curriculum by obtaining at least 240 ECTS and at least DD/S grades and to have a Weighted General Grade Point Average (CGPA) of 2.00 out of 4.00.

Academic Calendar 2026-2027

In this section, you can find important dates for the relevant academic year. The academic calendar contains critical information regarding course registration, semester start and end dates, exam weeks, holidays, and other academic processes.

Students are strongly encouraged to carefully review the calendar and follow the dates to ensure sound academic planning. The calendar, updated at the beginning of each semester, is also available on the faculty website or from the student affairs office.

FALL TERM	
July 1, 2026; Wednesday	Start of Internship Rotations for Faculty of Medicine Year 6
September 7, 2026; Monday	Start of Classes for Faculty of Medicine Years 4 and 5
September 7-11, 2026; Monday-Friday	Assignment of Courses to Academic Staff
September 8, 2026; Tuesday	Deadline for Initial Tuition Fee Payments (Full payment and first installment)
September 10-14, 2026; Thursday-Monday	Course Activation
September 14, 2026; Monday	Start of Classes for Faculty of Medicine Years 2 and 3
September 14, 2026; Monday	English Preparatory School, Turkish and Arabic Proficiency Exams (Undergraduate Students)
September 14-18, 2026; Monday-Friday	Course Registration
September 17, 2026; Thursday	First English Proficiency Exam of the Semester (Graduate Students)
September 18, 2026; Friday	Deadline for Graduate Thesis Jury Submission
September 21, 2026; Monday	Start of Classes (Including all Preparatory Schools)
September 28, 2026; Monday	Start of Classes for Faculty of Medicine Year 1

Registration and Admission Procedures

International Student Affairs is in the Faculty of Communication building and is open from Monday to Friday, between 08:00 and 17:00. Students can obtain information about faculties, complete registration procedures, and request documents such as exam entrance certificates, student certificates, and transcripts from the International Student Affairs Office.

Course Registration

Course registration is conducted online each semester. After completing the semester tuition payment, students can register for their courses via the online system at http://ogrsis.neu.edu.tr. To access this system, each student is provided with a student ID number and a personal password by the faculty secretary. After selecting their courses through the system, students must also obtain approval from their academic advisors via the same platform. The registration process is also outlined on the university's official website. However, students who have not paid their tuition fees or submitted their payment receipts to the Student Affairs Office will not be able to proceed with online registration. Final approval of course registration is completed by the academic advisors of the department. Additionally, students may complete course registration by meeting in person with their academic advisors within their departments. During the registration period, as indicated in the academic calendar, students are expected to consult with their advisors for course selection and academic guidance.

Add/Drop and Withdrawal

Each semester, specific Add/Drop and Course Withdrawal dates are determined and announced in the academic calendar. During this period, students can attend their registered courses and, if they wish, make changes by adding or dropping courses. All course withdrawal, course change, or course addition procedures must be completed within the dates specified in the academic calendar. Students must consult with their academic advisors to carry out the requested changes.

Lateral and Vertical Transfers

Students who wish to apply for a lateral or vertical transfer must apply to the Student Affairs Office. After the application is approved, the student must provide an official transcript from their previous university to the department they have been admitted to. Before the student begins their education, the Department Head/Dean and the assigned academic advisor will evaluate whether the courses previously taken are equivalent to the courses in the current program.

For students who are citizens of the Republic of Türkiye, the rules regarding transfers to Near East University can be reviewed at the following links in accordance with the Council of Higher Education (YÖK) and university regulations:

http://www.yok.gov.tr/4767

https://neu.edu.tr/wp-content/uploads/2023/05/29/YDU-Yatay-Gecis-Yonetmeligi-29.05.2023.pdf

Communication with Academic Staff

Subject	**Description**
Course Materials and Content	All course materials, weekly content, and announcements are shared via the **UZEBIM** platform: https://uzebim.neu.edu.tr/
Email Communication	You can contact academic staff through their **institutional email addresses**.

Face-to-Face Meetings	You can meet with academic staff during their **office hours**, which are posted on their office doors in the faculty building.
Academic Staff Information	CVs and contact information of academic staff are available at: https://hukuk.neu.edu.tr/kisiler/akademik-personel/

Class Attendance and Excused Absences

Students are required to attend at least 70% of the total course hours for each course. If a student is unable to attend an exam, they must submit their medical report (issued by Near East University Hospital or a state hospital) within 3 working days following the exam date. Otherwise, the student will lose the right to take the make-up exam.

Students are responsible for following the make-up exam schedule through the university's announcements page or the instructor's personal page. If a student misses a previously announced make-up exam without a valid excuse, they will lose the right to take that exam.

Student Affairs

The Student Affairs Registration and Admissions and Student Accounting Units are responsible for maintaining student records from initial registration to graduation, informing students about payment procedures, guiding students within the framework of relevant regulations, and managing student documentation processes.

The Student Affairs Registration and Admissions Unit handles registration and admission procedures (pre-registration, final registration, course registration, etc.), student documentation procedures (student certificate, transcript, etc.), transfer procedures, immigration procedures, military service deferment, registration cancellation/dismissal, academic leave procedures, student ID card applications, student petition acceptance, YÖKSİS (e-Government) procedures for Turkish nationals, TRNC-YÖKAS (higher education registration system), student information system updates, official student affairs correspondence, student announcements, and graduation procedures (Graduation Certificate/Diploma/Graduate Transcript, etc.). The Student Affairs Accounting Unit handles: Student tuition fees (tuition, social events, internships, stamp duty, transcript fees, etc.), payment method options (cash or installment), student status determination (active, passive student, etc.), semester registration, master's and doctoral course approval, midterm/final/summary exam entry document approval, and accounting petition evaluation are carried out.

Student Affairs Office Working Hours:
Monday-Friday 8:00 AM - 5:00 PM.
Closed on public holidays. Student Affairs Contact Information:
Student Affairs Director: Hüseyin Kuşo
Phone: 0392 680 2000 / Ext. 3131
E-Mail: huseyin.kuso@neu.edu.tr
Registration and Admissions Officer: Güngör Kaya
Phone: 0392 680 2000 / Ext. 3131
E-Mail: gungor.kaya@neu.edu.tr

Campus Life

Library

Located directly across from the Faculty of Economics and Administrative Sciences building, the Grand Library features over 1,000,000 open-shelf books, 150 million electronic journals, 7,000 DVDs, 17 film viewing booths, 12 individual and group study rooms, 4 lecture halls with 1,000 seats, a theatre hall with a capacity of 350, a cafeteria for 600, and 600 study desks. This makes it a world-class cultural and information-access centre. The library is open 24/7 and is free of charge. The information centre, equipped with the latest digital technologies, is accessible from anywhere via the internet. Students can also access information throughout the campus via wireless internet.

Social Activities and Student Clubs

Students can participate in various activities throughout their studies, including university-sponsored conferences and club activities that encourage social engagement. Some active clubs include the Law Club, Nature and Sports Club, Scientific Research and Health Club, Theatre Club, Photography Club, and Tango Club. For more information, visit:
https://neu.edu.tr/kampusteyasam/sosyal-ve-kulturel-kulupler/
The campus also features the country's first and only Olympic Indoor Swimming Pool, covering 2,700 m², with a height of 16 meters, dimensions of 50 x 21 meters, 3,100 tons of water capacity, central heating, 1,000 spectator seats, and diving towers at 3, 5, 7, and 10 meters. Swimming courses are offered in both summer and winter.
https://neu.edu.tr/kampusteyasam/olimpik-kapali-yuzme-havuzu/

Psychological Counselling Services

Since 1995, the university has offered free psychological counselling. The Counselling Centre is located on the first floor of the Faculty of Law building. It operates by appointment and is open weekdays from 09:00–13:00 / 14:00–16:00.

Office of the Dean of Students

This office aims to provide an integrated university life where students and alumni feel supported in all aspects of their personal, cultural, social, and professional development. The Dean of Students offers various services and programs to support academic and personal growth, instilling a sense of confidence in students as they prepare for life beyond graduation.

Units under the Dean of Students include Student Counselling and Communication Unit**,** Psychological Counselling Unit**,** Student Activities Unit**,** NEU ideas Unit**,** Career Planning Unit**,** Social Responsibility Projects Unit**,** Students with Disabilities Unit**,** Alumni Affairs Unit**.** If you require support in accessing courses due to a disability, please contact the Accessible Support Unit: engelsiz@neu.edu.tr

Student Counselling and Communication Unit

In cases where students face unexpected or uncontrollable circumstances that affect their academic responsibilities, they can submit petitions through the online system or via email for issues such as refunds, academic matters, job applications, accommodation, or financial concerns: petitions@neu.edu.tr

Sports Facilities

The university offers a wide range of modern sports facilities to promote a healthy lifestyle among students, staff, and faculty. Facilities include an Olympic swimming pool, tennis courts, football fields, gymnastics halls, and both indoor and outdoor sports complexes.

Our Olympic Indoor Swimming Pool has a 1,000-seat capacity, modern amenities, and a café. Activities such as water polo, diving, and synchronized swimming, as well as swimming lessons, are regularly held. The Sports Tower is a high-tech fitness centre for all age groups, offering classes and sessions in: Fitness, Step, Aerobics, Spinning, TRX, Kangoo Jumps, Pilates, Yoga, Boxing, Karate, Dance education, Nutrition & diet services, with special sections for children and women. RA25 Sports Hall hosts competitions in basketball, handball, volleyball, and badminton, and functions as a venue for ceremonies and concerts with its advanced sound system.

https://neu.edu.tr/kampuste-yasam/spor/
https://neu.edu.tr/wp-content/uploads/2018/12/21/spor-kule-brosur-21.12.18.pdf

Atatürk Culture and Congress Centre (AKKM)

This state-of-the-art venue hosts national and international congresses, seminars, conferences, and cultural events. It features various-sized meeting halls, modern audiovisual equipment, and spaces for art exhibitions, concerts, theatre performances, and more — enhancing campus life through arts and culture.
https://neu.edu.tr/kampuste-yasam/ataturk-kultur-ve-kongre-merkezi/

Restaurants and Cafeterias

The campus features a wide range of food and beverage outlets, including the Main Cafeteria, Faculty Cafeteria, Hospital Cafeteria, and others with a total service capacity of 4,500 people. Across campus, there are 22 cafes and restaurants offering healthy, affordable meals, with options for vegetarians and vegans.

Some of the dining facilities include:

Cafe Hastane 1 & 2, Cafe Bigla, Cafe Dental, Cafe Ecza, Cafe Saray, Chicken House, Cafe Library, Cafe Bridge, Cafe Veterinerlik, Gusto Cafe, Cafe Sağlık, Vitamin Cafe, Cafe 535, Cafe AKKM, Book Cafe, Cafe Laundry, Hospital Restaurant, Kebap House, Pizza Pizza, The Kaffo, Bakery & Patisserie, and the 9th Floor Restaurant.

For more information:

https://neu.edu.tr/kampuste-yasam/kantin-ve-kafeteryalar/

Market & Supermarket

IKAS Supermarket

Located on our campus, IKAS Supermarket serves campus residents with a wide range of products and extended working hours to meet all their daily needs. Additionally, there is a branch of IKAS Supermarket located under Dormitory Building 1, designed to serve students' essential needs.

Working Hours:

Weekdays/Weekends: 07:30 – 22:00

IKAS Supermarket Express

IKAS Supermarket Express, located within the Near East Campus at Near East Fuel Station, is open 24/7. Discounts available to Near East Group employees are also valid at this location.

NEU Event Park Drift Area

For those seeking speed, control, and excitement, NEU Event Park Drift Area offers an unforgettable driving experience. Under the supervision of two expert instructors, you will not only learn how to drift, but also improve your safe and effective driving techniques. Tire and fuel costs are included in the training packages. Each session lasts

30 minutes. NEU Event Park offers 4 different training packages, tailored to various expectations. There is even a special course for young car enthusiasts: children aged 6–12 can participate in a manual driving course designed especially for them. For international visitors, accelerated 3-lesson programs are available to help them quickly learn the basics of drifting. Upon successful completion of the training program, a certificate of participation is awarded to all participants (excluding tourist guests and children's courses). The drift area can also host special events such as birthday parties and concerts.

Working Hours:

- Weekdays: 16:00 – 21:00
- Weekends: 09:00 – 21:00 Flexible closing hours are available for special events or upon request.

For detailed information about packages and pricing: Phone: +90 548 821 21 24

Accessible Cinema Hall

The newly renovated "Accessible Cinema" Hall at the Faculty of Communication, Near East University, offers a modern and inclusive experience for cinema enthusiasts and event participants. Originally launched in 1997 with the support of Telsim, the hall has recently undergone a comprehensive renovation and is now more equipped and comfortable than ever.

The Accessible Cinema features 40 fixed seats, with a flexible setup that can accommodate up to 60 people when needed. It is equipped with a state-of-the-art projection system compatible with all types of computers and has a powerful sound system to ensure an enhanced audio experience.

One of the hall's most significant features is its fully accessible ramp, which provides seamless access from the outside entrance to the seating area, allowing individuals with disabilities to enjoy events without barriers In addition to film screenings, the Accessible Cinema is also physically suited for mini workshops and various events.

IKAS Patisserie & Bakery

One of the most popular spots on the Near East University campus, IKAS Patisserie & Bakery welcomes guests with a delightful atmosphere and a wide variety of delicious offerings. The venue has a total seating capacity of 40 people, including 20 indoor and 20 outdoor seats, allowing visitors to enjoy their time both inside and in the open air. In addition to meeting the university's in-house needs for cakes, pastries, savoury snacks, desserts, and ice cream, IKAS Patisserie & Bakery also serves fresh and tasty products to external guests. Soon, it plans to expand its kitchen and begin producing its own bread. For those focused on healthy living, specially made diet desserts and drinks designed for pre- and post-workout consumption will also be available.

With an extensive menu of hot and cold beverages, the patisserie caters to all tastes and also takes custom orders for birthday cakes and special celebrations. The outdoor garden area has been designed to offer enjoyment all year round — cool shaded areas in summer, and warm cozy spots with stoves in winter. Parking is available for guests, and the venue especially welcomes those seeking a peaceful breakfast experience on weekends. On Saturdays and Sundays, rich classic and English breakfast options are served until noon — a perfect way to start your day!

Opening Hours: Weekdays / Weekends: 07:00 – 01:00

Photocopy Services

Near East University offers photocopying and printing services at various locations across campus for students and staff. These service centres aim to provide fast and reliable solutions for educational and academic needs. Photocopy centres are available in faculties with high printing demands, such as the Faculty of Architecture, Faculty of Medicine, and Faculty of Education. These centres offer specialized printing services, including large-format AutoCAD printouts for architecture students. Additionally, thesis binding services are available for students preparing their theses. Along

with basic services like photocopying and printing, document scanning and various binding options are also provided. A stationery shop within the Near East University Library offers services such as photocopying and thesis binding.

Cyprus Printing Global
Hospital Branch: +90 546 990 01 03
Education Palace Branch: +90 546 990 01 04
Architecture Faculty Branch: +90 546 990 01 05
Nuroğlu Stationery (Library): +90 533 866 89 36

Bank & ATM

On campus, you will find branches of Near East Bank and Türkiye İş Bankası, as well as an ATM for Ziraat Bankası. These banking services are conveniently located to ensure that both students and staff can easily carry out their financial transactions.

Post Office

The Post Office at Near East University provides postal services to all students and staff. It is located on campus for easy access to both send and receive mail.

Location: Ground Floor, Faculty of Economics and Administrative Sciences

Near East Fuel Station

The on-campus fuel station provides university staff with a fast and convenient way to meet their fuel needs. In addition, all Near East University employees can benefit from discounted fuel services by using the Near East Fuel Discount Card. For more information about Near East Fuel Station, please visit the official website: https://yakindoguakaryakit.com/

Useful Phone Numbers

For more details about telephone contacts at Near East University and to find the phone numbers for specific departments or services, please visit the university's official website:
https://neu.edu.tr/telefon-rehberi/

Campus Traffic Rules and Safety

Near East University's campus is subject to specific traffic rules to ensure the **safety and comfort** of students, staff, and visitors. These rules are **monitored 24/7** by NEU personnel, and **penalties may be applied** in case of violations. A full understanding and application of these rules contribute to creating a safer and more orderly campus environment.

Traffic Flow and Right of Way: Traffic on the NEU campus flows in the left lane. Therefore, drivers must keep left and follow the right-of-way rules to ensure smooth traffic movement.

Pedestrian and Bicycle Priority Campus: Please give priority to pedestrians and cyclists in crosswalks and designated bike lanes. Slow down and proceed with caution in these areas to ensure safety.

Speed Limit: The maximum speed limit on campus is 40 km/h. Adhering to this limit significantly reduces the risk of accidents and enhances overall safety.

Horn and Loud Music: Using car horns and playing loud music is prohibited on campus. Following this rule helps maintain a peaceful environment for everyone.

Traffic Signs and Directions: Traffic signs and directional markers are placed throughout the campus to support safe and orderly traffic flow. Please always follow these signs.

Routes and Parking Areas: Use designated driving routes and park only in designated areas in accordance with the campus parking regulations. This ensures safety and avoids traffic disruption.

Monitoring and Security: Traffic rules are regularly monitored by security personnel. Please follow their instructions and do not hesitate to ask for help if needed. Adhering to safety measures ensures a smooth and respectful traffic environment for all. By respecting these rules, we can collectively contribute to a safer and more peaceful campus.

Transportation Services

Near East University provides its staff with comfortable and free transportation options, ensuring easy access to both the campus and surrounding areas. The university's transportation services cover routes that are scheduled according to class and work hours. Free university buses departing from the campus and heading to various regions and the city centre offer a wide transportation network. This service aims to reduce vehicle usage and promote environmentally friendly shared transport. Free transportation services are a significant support in facilitating the daily lives of staff.

Campus–Nicosia and Nicosia–Campus Routes: Shuttle services between the campus and Nicosia operate from 06:45 AM to 10:15 PM. These reciprocal services allow our staff to travel comfortably and safely between the campus and Nicosia. The routes cover a wide area. Detailed information about transportation services and routes is available on the university's website: https://bus.neu.edu.tr/

Intercity Free Shuttle Services: Near East University offers free shuttle services for staff commuting from regions such as Kyrenia (Girne), Famagusta (Mağusa), and Güzelyurt. These services are organized to ensure staff can reach the campus comfortably.

In-Campus Shuttles: Within the campus, there is a free shuttle service between the residential area and faculties or other administrative units. These shuttles facilitate quick and easy access across campus.

Walking Distance Accessibility: The Near East University campus is designed to allow safe walking access to most places. Classrooms, the library, the dining hall, and other key facilities are located within short walking distances. The campus design promotes physical activity and minimizes the need for motor vehicles. Additionally, the university provides alternative eco-friendly transport options such as bicycles and electric scooters for staff use.

By offering these transportation options, Near East University enables its staff to easily access campus events and resources. It supports its personnel in maintaining a productive work-life balance through a safe and extensive transportation network across its large campus area.

Who ARE YOU? WHERE ARE YOU?

- Faculty Founding Year: 2021
- Goal: To become an internationally recognized faculty
- Total Programs: 4 undergraduate, 2 graduates

- Languages of Instruction: Turkish and English
- Number of Students: 50+

🧿 ANIMAL SCIENCE DEPARTMENT

- Deputy Head of the Department: Dr. Hüseyin Çelik
- Contact: huseyin.celik@neu.edu.tr
- Degree Awarded: Bachelor of Arts in Animal Science
- Total Credits: 240 ECTS
- Number of Elective Courses: At least 17

☑ GRADUATION REQUIREMENTS

- To complete all courses with at least a DD/S letter grade
- Cumulative Grade Point Average (CGPA): At least 2.00 / 4.00
- 70% class attendance requirement
- 17 elective courses must be taken

📓 REGISTRATION & ADMISSION PROCEDURES

1. **Pay the tuition fee**
2. **Register for courses via ogrsis.neu.edu.tr**
3. **Get advisor approval**
4. **If necessary, make changes during the "add/drop" week**

🏫 CAMPUS LIFE

- 📖 Library: Open 7/24 open, 1 million books, 150 million digital resource
- 🧿 Dining: 22 restaurant & cafe, vegan/vegetarian menu
- 🏊 Sport: Olympic pool, yoga, fitness, dietitian support
- 🧠 Psychological Counselling: Free, appointment-based system

📌 DO NOT FORGET!

- At Near East University, education is not only academic; it's an integrated journey of social, cultural, and personal development. Let this brochure be your guide as you take your first steps!

APPENDIX A - PROGRAM LEARNING OUTCOMES AND TQF-HETR ALIGNMENT

Program Learning Outcomes

Code	English	Türkçe
PLO1	Possesses theoretical and practical knowledge in animal breeding, feeds and animal nutrition, biometrics, and genetics, which constitute the core fields of Animal Science.	Zootekni ana bilim dalını oluşturan hayvan yetiştirme, yemler ve hayvan besleme, biyometri ve genetik alanlarında kuramsal ve uygulamalı bilgiye sahiptir.
PLO2	Evaluates new developments and applications in Animal Science and develops projects and solution proposals for problems encountered in animal production.	Zootekni alanındaki yeni gelişme ve uygulamaları değerlendirerek, hayvansal üretimde karşılaşılan sorunlara yönelik projeler ve çözüm önerileri geliştirebilme.
PLO3	Uses the infrastructure and laboratory facilities required to solve problems in the livestock sector in accordance with contemporary scientific and technological requirements.	Hayvancılık sektöründe karşılaşılan sorunların çözümüne yönelik gerekli altyapı ve laboratuvar olanaklarını çağın gereklerine uygun biçimde kullanabilme.
PLO4	Identifies problems in animal production and effectively presents developed solutions using written, oral, and visual communication tools.	Hayvansal üretim alanındaki sorunları tanımlayarak geliştirilen çözüm önerilerini yazılı, sözlü ve görsel araçlarla etkili biçimde sunabilme.
PLO5	Uses computer software, hardware, and information technologies required in Animal Science and adapts them to professional applications.	Zootekni alanının gerektirdiği bilgisayar yazılımları, donanımlar ve bilişim teknolojilerini kullanabilme ve mesleki uygulamalara uyarlayabilme.
PLO6	Participates in national and international projects and presents project results using scientific methods.	Ulusal ve uluslararası düzeyde yürütülen projelerde görev alabilme ve projelerden elde edilen sonuçları bilimsel yöntemlerle sunabilme.
PLO7	Works effectively in multidisciplinary fields and projects.	Multidisipliner çalışma alanlarında ve projelerde etkin biçimde görev alabilme.
PLO8	Transfers scientific knowledge obtained through research and technology transfer to education and society.	Araştırma ve teknoloji transferi yoluyla elde edilen bilimsel bilgileri eğitime ve topluma aktarabilme.
PLO9	Develops the ability to prepare, write, and present scientific articles at national and international levels.	Ulusal ve uluslararası düzeyde bilimsel makale hazırlama, yazma ve sunma becerisi kazanabilme.
PLO10	Practices the profession with awareness of authority and responsibility in accordance with scientific and professional ethical principles.	Bilim ve meslek etiği ilkelerine uygun davranarak, yetki ve sorumlulukları çerçevesinde mesleğini icra etme bilincine sahip olma.

TQF-HETR Level 6 - Program Learning Outcomes Alignment Matrix

Scoring: 1 = none/very low, 2 = weak, 3 = medium, 4 = good/high, 5 = very good/very high contribution.

TQF-HETR Qualification	Category	PLO1	PLO2	PLO3	PLO4	PLO5	PLO6	PLO7	PLO8	PLO9	PLO10
Has theoretical and applied knowledge related to agriculture, forestry and fisheries.	KNOWLEDGE - Theoretical/Factual	4	4	4	3	3	2	2	3	2	2
Has knowledge of methods for evaluating the accuracy, reliability and currency of acquired information and for producing knowledge.	KNOWLEDGE - Theoretical/Factual	3	3	3	3	3	2	2	3	3	2
Recognizes knowledge related to ecosystems, biodiversity and sustainable resource management, rural development, design, planning and technology use.	KNOWLEDGE - Theoretical/Factual	3	3	3	3	3	2	2	3	2	2
Has knowledge of measuring and evaluating strategies, methods and techniques related to the field.	KNOWLEDGE - Theoretical/Factual	3	3	4	4	3	3	3	3	3	2
Has knowledge of food, renewable energy/bioenergy, raw material production and/or processing processes.	KNOWLEDGE - Theoretical/Factual	3	3	3	3	4	3	2	3	2	2
Examines events and phenomena related to the field using scientific methods and techniques by applying acquired theoretical and practical knowledge.	SKILLS - Cognitive/Applied	3	3	4	4	4	4	3	3	3	2
Interprets and evaluates obtained data.	SKILLS - Cognitive/Applied	3	3	4	4	4	3	3	3	3	2
Identifies and analyzes problems and	SKILLS - Cognitive/Applied	3	4	4	4	4	3	3	3	3	2

develops evidence-based solution proposals.											
Conducts field-related studies independently and undertakes consultancy, supervision and expert duties.	COMPETENCE - Independent Work and Responsibility	2	3	3	3	3	3	4	3	3	2
Takes individual or team responsibility to solve unforeseen problems encountered in applications.	COMPETENCE - Independent Work and Responsibility	2	3	3	3	3	3	4	3	3	2
Plans and manages activities for the development of people working under their responsibility.	COMPETENCE - Independent Work and Responsibility	2	2	2	3	3	2	3	2	2	2
Works in interdisciplinary settings.	COMPETENCE - Independent Work and Responsibility	2	3	3	3	3	3	4	3	3	2
Develops a positive attitude toward lifelong learning by using knowledge and skills acquired in the field.	COMPETENCE - Learning	3	3	3	3	3	3	3	4	3	3
Questions and conducts research.	COMPETENCE - Learning	3	3	3	3	3	3	3	4	3	3
Accesses information, thinks analytically, and carries out design activities.	COMPETENCE - Learning	3	3	3	3	3	3	3	4	3	3
Uses acquired knowledge for the benefit of society.	COMPETENCE - Learning	2	2	2	3	3	2	3	3	3	2
Is sensitive to and follows events and developments on the agenda of society and the world.	COMPETENCE - Communication and Social	2	2	2	3	3	2	3	3	3	2
Produces and implements projects for the social environment with a sense of social responsibility.	COMPETENCE - Communication and Social	2	2	2	3	3	2	3	3	3	2
Informs relevant persons and institutions about field-related	COMPETENCE - Communication and Social	2	2	2	3	3	2	3	3	4	3

issues; communicates ideas and solution proposals in writing and orally, contributing to public awareness.											
Supports ideas and solution proposals with data and shares them with specialist and non-specialist audiences.	COMPETENCE - Communication and Social	2	3	3	3	3	3	3	3	4	3
Lives in different cultures and adapts to social life.	COMPETENCE - Communication and Social	2	2	2	3	3	2	3	3	3	2
Uses at least one foreign language at B1 level of the European Language Portfolio to follow field-related information and communicate with colleagues.	COMPETENCE - Communication and Social	1	1	1	1	2	2	2	2	3	4
Uses computer software and information and communication technologies at an advanced level required by the field.	COMPETENCE - Communication and Social	2	3	3	4	4	4	3	3	3	2
Prepares, implements, manages and monitors plans and projects in agriculture, forestry and fisheries considering environmental, technical, technological and economic dimensions.	COMPETENCE - Field-Specific	3	3	4	4	4	3	3	3	3	2
Acts in accordance with scientific, cultural and ethical values.	COMPETENCE - Field-Specific	3	3	3	3	3	3	3	3	3	3
Has command of legislation related to the field and acts accordingly.	COMPETENCE - Field-Specific	3	3	3	3	3	3	3	3	3	3
Has adequate awareness of universal social	COMPETENCE - Field-Specific	3	3	3	3	3	3	3	3	3	3

rights, social justice, quality culture, protection of cultural values, environmental protection, occupational health and safety.											

APPENDIX B - CURRENT CURRICULUM SUMMARY

The updated curriculum used in this handbook contains 63 courses, 17 electives, 154 local credits and 240 ECTS. The elective ratio shown in the supplied curriculum is 27%.
